

# Importing from google docs/drive

autoChirp Help

To import a spreadsheet from google drive/docs, You need to prepare the sheet according to the autoChirp import-format first.

[Home](#)[About](#)[Trivia](#)[Help](#)[Stats](#)[Tweets](#)[Groups](#)

### Importing from GoogleDrive

Using the GoogleDrive public API, You can import a specifically layouted spreadsheet by just supplying the URL of Your publicly shared spreadsheet. You can use [this template](#) to quickly create a spreadsheet with Your own Tweets. When You have filled in Your data, just share the sheet via link, as described [here](#), and paste that link to the autoChirp import-form for GoogleDrive sources.

### Importing from Wikipedia

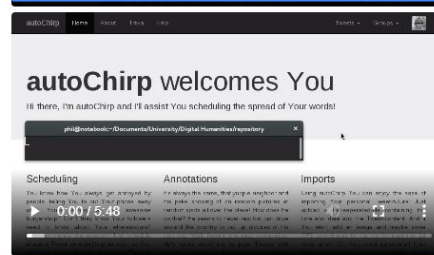

One way of adding a set of Tweets without going through the manual workflow for each Tweet, is to import Tweets from (the German or English) Wikipedia. This is achieved by submitting the Wikipedia-import form containing the URL to the Wikipedia-article to be parsed along with the desired group title and description and possibly a prefix. The referenced article will then be computed, all extracted dates will be used to schedule a Tweet with the sentences containing the extracted date as Tweet-content.

### Importing TSV-files

Probably the most effective way to add huge sets of Tweets, possibly with image attachment and geolocation, is importing them from a TSV (tab-separated-values) file. The format of the file has to be exactly as follows (a comma represents a tab in the actual file): Date, time, Tweet content, Threading, image attachment, latitude, longitude. Uploading files which do not concur to this format will result in errors.

### Flashcards

To ease the creation of such a spreadsheet, there is a template You should use (the link can be found within the autoChirp help pages).

# Open autoChirp google import form

[Home](#)[About](#)[Trivia](#)[Help](#)[Stats](#)[Tweets](#)[Groups](#)

Hi there, I'm autoChirp and I'll assist You scheduling the spread of Your words!

[View groups](#)[Add new group](#)[Import from GoogleDrive](#)[Import from Wikipedia](#)[Import from TSV-file](#)

## Scheduling, Imports and much more

autoChirp is a small and easy-to-use webapplication to ease the scheduled publication of Your Tweets. You don't have to worry about missing relevant dates as Your stepmothers birthday anymore, just schedule a Happy-Birthday-Tweet within autoChirp and get back to Your daily life.

If You're a power-user, upload a bunch of Tweets from Your desktop or GoogleDrive: Just follow the markup-guidelines describing the creation of a Tweet-table or clone the predefined GoogleDrive Spreadsheet, input Your data and import the file - et voilà!

Further, autoChirp empowers You to fit more content into Your Tweets by providing the possibility to automagically convert Your longer-than-280-character-Tweets into an image. So whenever You send out an overlength Tweet, remember: You couldn't, without autoChirp.

And of course: Much more!

## Recent Tweets by autoChirp

# Just add the link, a name and a description and hit the import button

## Group import

Import Your custom Gdrive Tweet groups

Import source	<input type="text" value="https://docs.google.com/spreadsheets/d/1hdt6-BtZvE0G2Nfg4V1sT3X2lcgZZH7GJYpiv0Y14VI/edit?usp=sharing"/>
Encoding	<input type="text" value="UTF-8"/>
Title	<input type="text" value="A from google docs imported group"/>
Description	<input type="text" value="A group from Google"/>
Delay in years	<input type="text" value="Delay in years, past dates will be ignored. Inputting '0' maps all past dates to their next anniversary."/>
Actions	<input type="button" value="Import group"/>

The delay is used to specify, how many years should be added to the dates, parsed from the Gdrive-file.

# Finish import

## Tweet groups View and edit Your tweet groups

Title	#	Description	Status	select all <input type="checkbox"/>
A from google docs imported group_Thread_Kultur	3	A group from Google	Disabled	<input type="checkbox"/>
A from google docs imported group_Thread_1	3	A group from Google	Disabled	<input type="checkbox"/>
A from google docs imported group	4	A group from Google	Disabled	<input type="checkbox"/>
A from google docs imported group_Thread_2	2	A group from Google	Disabled	<input type="checkbox"/>
				<input type="button" value="delete selected groups"/>

If You have added tweets to at least one thread, You will be taken to the list view of Your groups after the successful import. There You will find Your created group and additionally for each thread an additional group named according to the pattern: [name of Your group]\_Thread\_[name of the thread].

# Otherwise the TweetGroup-View will open.

## Group details View and edit Your tweet group
